PROFESSIONAL SUMMARY

Business Intelligence Analyst with a Bachelor of Economics and 3 years of experience designing end-to-end analytics solutions using SQL, BigQuery, dbt, Power BI, Looker Studio, and Google Cloud Platform. Skilled in building scalable data pipelines, dimensional data models, and automated quality-testing frameworks that turn raw data into executive-ready dashboards. Proven track record of identifying revenue and retention opportunities worth millions of dollars through customer analytics, cohort analysis, and fraud risk monitoring. Passionate about translating complex data into clear, actionable insight for business stakeholders.

KEY ACHIEVEMENTS

- Designed and deployed three end-to-end Business Intelligence platforms spanning retail, e-commerce, and fraud analytics using BigQuery, dbt, Power BI, and Looker Studio.
- Built a production-grade dimensional data model (11 dbt models, 51 automated data quality tests) for a retail analytics platform processing 50,000+ transactions.
- Implemented Row-Level Security across BigQuery and Power BI, enabling secure self-service reporting for five regional management teams.
- Delivered customer analytics insights identifying ~\$20M in revenue growth opportunities and ~\$17M in retention risk through CLV modeling and cohort analysis.
- Automated daily data refresh pipelines (GCS → Cloud Functions → BigQuery → dbt → Dashboards), reducing manual reporting effort and improving data freshness.

CORE SKILLS

BI & Analytics: Business Intelligence, Dashboard Development, KPI Reporting, Executive Reporting, Performance Analytics

Databases & Warehousing: SQL, BigQuery, Data Warehousing, Data Validation, Data Quality Management, Data Governance

Data Modeling: Star Schema, Dimensional Modeling, Fact & Dimension Tables, Data Architecture

ETL / Analytics Engineering: dbt, ETL/ELT Pipelines, Data Transformation, Workflow Automation

Visualization Tools: Power BI, Looker Studio, Excel, Google Sheets

Cloud Technologies: Google Cloud Platform, BigQuery, Cloud Functions, Cloud Storage

Analytical Techniques: Customer Lifetime Value (CLV), RFM Segmentation, Cohort Analysis, Fraud Analytics, Statistical & Trend Analysis

Tools: Git, GitHub, Python (data cleaning), R

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst — CKL Africa, Nairobi

Sep 2024 – Apr 2026

- Extracted, cleaned, and analyzed business data using SQL, Python, Excel, and R to support cross-functional reporting needs.
- Built and maintained interactive dashboards, refreshing them with new data and producing ad-hoc reports for stakeholders.
- Authored summary reports translating analytical findings into clear, actionable business recommendations.
- Communicated complex analytical concepts to diverse stakeholders during stand-ups, strategy discussions, and presentations.

Data Annotation Specialist — Ison X-periences Ltd, Nairobi

Sep 2023 – Aug 2024

- Labelled and categorized large volumes of raw data according to defined project criteria and quality guidelines.
- Cleaned and validated datasets prior to annotation, ensuring accuracy and consistency across the project.

- Transcribed spoken content into text and supported broader database maintenance and information management tasks.

Registration & Claims Officer — NHIF, Malindi

Jun 2023 – Aug 2023

- Processed insurance claims and registrations in compliance with operational procedures and quality standards.
- Investigated claim discrepancies and resolved data-related issues using analytical problem-solving techniques.
- Maintained accurate records to support reporting and audit requirements, and coordinated logistics with the wider team.

KEY ANALYTICS PROJECTS

Retail Analytics & Customer Lifetime Value (CLV) Platform [\(GitHub\)](#)

- Architected a production-grade analytics platform: automated ELT pipelines (GCS → Cloud Functions → BigQuery), a dimensional star schema in dbt (11 models, 51 tests), and Row-Level Security for five regional teams.
- Built Power BI and Looker Studio dashboards for CLV prediction, RFM segmentation, and retention cohort analysis, surfacing ~\$20M in revenue opportunities and ~\$17M in retention risk.
- Technologies: SQL, BigQuery, dbt, Power BI, Looker Studio, Google Cloud Platform, Git/GitHub.

Credit Card Fraud Analytics Platform [\(GitHub\)](#)

- Performed exploratory data analysis to uncover transaction anomalies and behavioral fraud patterns.
- Built interactive dashboards and KPI frameworks for fraud monitoring, transaction trends, and risk management.
- Technologies: SQL, Power BI, Excel, Data Modeling, Statistical Analysis.

E-Commerce BI & Sales Analytics Platform [\(GitHub\)](#)

- Built dashboards tracking revenue, customer acquisition, product performance, and operational KPIs.
- Performed customer segmentation and purchasing-behavior analysis to identify growth opportunities, and designed executive scorecards and automated reports.
- Technologies: SQL, Power BI, Excel, Business Intelligence, Data Visualization.

EDUCATION

Bachelor of Economics — University of Nairobi

2020 – 2024

CERTIFICATIONS

- Introduction to Business Intelligence — Corporate Finance Institute (CFI)
